Certificate of Participation in AIQrew 2025

DeepSeek AI Masterclass: Build, Automate, Monetize Like a Pro

Data Analysis & AI: From Data to Intelligent Decisions

Learning & Development with Generative AI

Certificate of Participation in TATA Crucible Campus Quiz 2025 of TATA Crucible Campus Quiz 2025

Kaveri Desai

Pursuing AIML Engineering @ISB&M COE
Pune District, Maharashtra, India

Summary

I'm a second-year B.E. student specializing in Artificial Intelligence and Machine Learning at ISBM. Passionate about exploring how intelligent systems shape the future, I'm currently building a strong foundation in programming, data structures, and AI concepts.

Beyond academics, I enjoy creative expression through drawing and staying updated with the latest tech trends by browsing and researching online. I'm eager to take on internships, projects, or collaborations that allow me to apply my skills in real-world scenarios and continue learning.

Areas of Interest:

Artificial Intelligence & Machine Learning

Python Programming

Data Science

Tech Research

Creative Problem Solving

Experience

Xyzon Innovations Private Limited

Gen-AI Intern

February 2026 - May 2026 (4 months)

Pune District

* Worked as a Full Stack Development & AI Intern on real-world web applications and SaaS-based projects using MERN Stack, AI integrations, REST APIs, and modern frontend/backend technologies.

AI Resume & Portfolio Generator

Developed an AI-powered platform for generating ATS-optimized resumes and portfolio websites.

Key Contributions:

- * Built multi-step onboarding forms with auto-save functionality.
- * Implemented AI-powered content generation and ATS scoring systems.
- * Developed PDF export functionality and responsive dashboards.

Technologies & Skills:

React.js • TypeScript • Tailwind CSS • Node.js • Express.js • MongoDB • GPT-4o • Puppeteer • REST APIs

AI Resume Builder

Built a professional AI resume builder focused on ATS-friendly resume generation and intelligent formatting.

Key Contributions:

- * Developed AI-based resume content generation features.
- * Implemented ATS scoring and keyword optimization systems.
- * Built secure authentication and PDF rendering workflows.

Technologies & Skills:

React.js • Tailwind CSS • Node.js • Express.js • MongoDB • JWT Authentication • html2pdf.js • REST APIs

XYZON Innovations Assistant – AI Support Chatbot

Developed an AI-powered chatbot for internship, LMS, and resume support.

Key Contributions:

- * Implemented intent classification and contextual response handling.
- * Built FAQ-based chatbot workflows and responsive UI.

- * Integrated frontend and backend communication systems.

Technologies & Skills:

Python • FastAPI • JavaScript • HTML5 • CSS3 • API Integration

Finora – SaaS GST & Compliance Management System

Worked on a MERN stack SaaS platform for GST automation and compliance management.

Key Contributions:

- * Developed backend APIs and authentication systems.
- * Worked on OCR-based invoice processing workflows.
- * Implemented GST calculation and dashboard modules.

Technologies & Skills:

React.js • Node.js • Express.js • MongoDB • OCR Integration • REST APIs • Dashboard Development

TechnoHacks EduTech Official

Machine Learning Intern

January 2026 - February 2026 (2 months)

Worked as a Machine Learning Intern on project-based tasks focused on model optimization and data improvement workflows.

Performed hyperparameter tuning using GridSearchCV/RandomizedSearchCV to identify optimal parameters and boost model performance.

Applied feature engineering techniques to create, transform, and refine dataset features for improved learning outcomes.

Evaluated model performance before and after tuning/feature engineering to measure impact and reliability.

Used Python, Pandas, and Scikit-learn to execute end-to-end ML workflows including preprocessing, tuning, and analysis.

Gained hands-on experience in feature engineering, model optimization, ML pipelines, and real-world problem solving.

Edunet Foundation

AIML Intern

January 2026 - February 2026 (2 months)

Worked as an AI Intern at Edunet Foundation under the IBM SkillsBuild AI Program , where I learned core AI fundamentals and applied them to build real-world solutions. I successfully completed the IBM AI Fundamentals course, gaining strong foundational knowledge in Artificial Intelligence, Machine Learning, and NLP. Leveraging this learning, I developed an **AI-powered Fake News Detector** that analyzes news content and classifies it as real or fake using intelligent prediction models.

This experience helped me combine theoretical AI concepts with practical implementation to build a socially impactful AI solution.

Key Contributions

- Successfully completed the IBM AI Fundamentals course (certificate earned), mastering essential AI and ML concepts aligned with industry standards.
- Developed an AI-powered Fake News Detection system that classifies news articles using Machine Learning and NLP techniques.
- Implemented text preprocessing techniques such as tokenization, stopword removal, and vectorization for accurate model performance.
- Trained and tested classification models to detect misinformation effectively.
- Built a user-friendly interface to allow users to input news content and receive real-time predictions.
- Managed end-to-end project development including data collection, model training, backend logic, and deployment-ready structure.
- Documented the project workflow and uploaded the complete code to GitHub showcasing full AI project lifecycle.

Skills & Technologies

- Artificial Intelligence
- Machine Learning
- Natural Language Processing (NLP)
- Text Classification Models
- Data Preprocessing
- API Integration

- Python
- Full-Stack Development
- Git & GitHub

Microsoft | Azure Cloud

| AI |

Partner

Intern- Emerging Technologies

January 2026 - February 2026 (2 months)

Pune, Maharashtra, India

Successfully completed a 4-week internship under the Microsoft Elevate Emerging Technologies Program, gaining hands-on exposure to Azure Fundamentals, Power BI, and Copilot-enabled development.

Completed structured learning paths and assessments on Microsoft Learn and the LMS platform

Worked under mentor guidance to design and develop a real-world, industry-oriented project

Built interactive dashboards and business insights using Power BI

Gained foundational experience in cloud computing (Azure) and AI-assisted development tools

Strengthened skills in project planning, execution, and presentation through guided mentorship

This internship was one of the most impactful learning experiences of my career, enhancing both my technical expertise and professional readiness.

UptoSkills

Artificial Intelligence Intern

September 2025 - December 2025 (4 months)

Pune, Maharashtra, India

Contributed to a FinTech CRM project focusing on customer data analysis.

Designed and implemented an analytics dashboard for business insights.

Supported landing page development to enhance user experience.

Applied AI concepts in real-world project scenarios.

Education

International School of Business & Media

Bachelor of Engineering - BE, Artificial Intelligence · (August 2024 - July 2028)

Huzurpaga, Girls School

12th · (June 2023 - July 2024)

NUTAN MARATHI SENIOR SECONDARY SCHOOL

10th · (June 2021 - April 2022)
