

KAVERI DESAI

Pune, Maharashtra, India | +91 87669 26040
kaveridesai1101@gmail.com | linkedin.com/in/kaveridesai

SUMMARY

Second-year Artificial Intelligence & Machine Learning engineering student with hands-on experience across five internships and four independent AI/full-stack projects. Built and shipped production-style systems spanning generative AI, computer vision, NLP, and the MERN stack, including an ATS-optimized resume builder, a real-time CCTV surveillance system, and a multi-model fake news detection platform. Strong foundation in Python, machine learning pipelines, and full-stack web development, with a track record of taking projects from concept to deployment-ready structure.

EDUCATION

International School of Business & Media (ISB&M)

Bachelor of Engineering in Artificial Intelligence & Machine Learning

Expected Graduation: 2028 | Current Year: Second Year

Relevant Coursework: Data Structures & Algorithms, Machine Learning Fundamentals, Python Programming, Linear Algebra, Probability & Statistics, Database Management Systems

Pune, Maharashtra

Aug 2024 – Jul 2028

TECHNICAL SKILLS

Programming Languages: Python, Java, C/C++, SQL, JavaScript, TypeScript, HTML5, CSS3

AI/ML Frameworks: TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, NLP

Web Development: React.js, Node.js, MongoDB, MERN Stack, FastAPI, REST APIs, JWT Authentication, Tailwind CSS

Tools & Technologies: Git, Jupyter Notebook, VS Code, Linux, Docker, Copilot

Core Competencies: Machine Learning, Deep Learning, Data Analysis, Algorithm Design, Computer Vision, Natural Language Processing

Soft Skills: Team Leadership, Problem Solving, Research, Creative Thinking, Communication

PROFESSIONAL EXPERIENCE

Gen-AI Intern

Xyzon Innovations Private Limited

Feb 2026 – May 2026

Pune, Maharashtra

- Built full-stack web applications and SaaS features using the MERN stack, AI integrations, and REST APIs.
- Built multi-step onboarding forms with auto-save, AI content generation, ATS scoring, PDF export, and responsive dashboards.
- Developed an AI support chatbot with intent classification and FAQ-based workflows for internship, LMS, and resume queries.
- Contributed backend APIs, authentication, and invoice processing workflows to Finora, a GST compliance SaaS platform.

Machine Learning Intern

TechnoHacks EduTech Official

Jan 2026 – Feb 2026

Remote

- Performed hyperparameter tuning using GridSearchCV/RandomizedSearchCV to boost model performance.
- Applied feature engineering to transform and refine dataset features for improved learning outcomes.
- Evaluated model performance before and after tuning using Python, Pandas, and Scikit-learn.

AIML Intern

Edunet Foundation (IBM SkillsBuild AI Program)

Jan 2026 – Feb 2026

Remote

- Completed the IBM AI Fundamentals course, covering core AI and ML concepts aligned with industry standards.
- Applied AI, ML, and NLP fundamentals to build SatyaSetu, an AI-powered fake news detection platform (see Projects).
- Managed end-to-end development including data collection, model training, and deployment-ready structure.

Intern – Emerging Technologies

Microsoft (Elevate Emerging Technologies Program)

Jan 2026 – Feb 2026

Pune, Maharashtra

- Completed a 4-week internship under the Microsoft Elevate Emerging Technologies Program, gaining exposure to Copilot-enabled development.
- Designed a real-world, industry-oriented project under mentor guidance, building interactive dashboards and business insights.

Artificial Intelligence Intern

UptoSkills

Sep 2025 – Dec 2025

Pune, Maharashtra

- Built and tuned machine learning models for real-world applications, covering the full ML pipeline from preprocessing to deployment.
- Collaborated cross-functionally on AI solutions for a FinTech CRM project focused on customer data analysis.

- Built an analytics dashboard for business insights and supported landing page development to improve user experience.
- Researched emerging AI technologies and built scalable data processing workflows using Python and modern ML frameworks.

PROJECTS

Resume Builder [\[GitHub\]](#)

Xyzon Innovations Private Limited

Technologies: React, Vite, Tailwind CSS, Node.js, MongoDB, Mongoose, JWT, bcryptjs, Groq API (LLaMA 3) Feb 2026 – Mar 2026

- Developed a production-grade, AI-powered resume builder that converts minimal user input into ATS-optimized resumes with recruiter-level, metric-driven bullet points.
- Designed a multi-page A4 PDF rendering pipeline and a secure full-stack architecture with JWT authentication and OTP verification.
- Built a resilient backend parser with AST fallback to handle inconsistent LLM outputs, and integrated real-time ATS scoring and keyword optimization.

AI Smart Surveillance System for Public Safety [\[GitHub\]](#)

Jan 2026

- Developed an AI-powered surveillance system that analyzes live CCTV feeds using OpenCV and TensorFlow to detect suspicious activities such as loitering, aggressive movement, and unattended objects in real time.
- Integrated an LLM (Gemini API) to generate clear, human-readable incident reports, reducing reliance on manual monitoring for applications in smart cities, transportation hubs, and public safety systems.

Technologies: OpenCV, TensorFlow, Python, Gemini API

SatyaSetu – AI-Powered Fake News Detector [\[GitHub\]](#)

Edunet Foundation

Technologies: Python, PyTorch, Hugging Face Transformers, spaCy, Streamlit, MongoDB Atlas

Jan 2026

- Built an AI-powered verification platform combining DeBERTa-v3 classification, Sentence-BERT claim verification, and Distil-BART summarization to assess article credibility and detect bias.
- Generated a 0-100 credibility score using SHAP-based explainable AI, cross-referencing claims against fact-checking sources and presenting results through a student-friendly dashboard.

Resume Analyser & Internship Portal [\[GitHub\]](#)

Oct 2025 – Nov 2025

- Built an AI-powered platform connecting students with companies using NLP and Machine Learning to automate resume analysis and intelligent internship matching.
- Implemented resume parsing to extract skills, education, and experience, with a ranking algorithm generating compatibility scores and personalized recommendations.
- Developed recruiter tools for AI-assisted job posting and automated candidate scoring, plus admin controls for user management and platform monitoring.

Technologies: Next.js, FastAPI, Python, PostgreSQL/SQLite

LEADERSHIP & ACTIVITIES

Technical Team Lead – College AI/ML Club

ISB&M

- Led a team of 10+ students in organizing workshops and hackathons focused on AI/ML technologies, increasing club participation by 40%.
- Mentored junior students in Python programming and machine learning concepts through peer-to-peer learning sessions.

ACHIEVEMENTS & CERTIFICATIONS

- Certificate of Participation in AIQrew (2025); TATA Crucible Campus Quiz 2025
- DeepSeek AI Masterclass: Build, Automate, Monetize Like a Pro
- Data Analysis & AI: From Data to Intelligent Decisions; Learning & Development with Generative AI
- IBM AI Fundamentals (Edunet Foundation / IBM SkillsBuild)
- Active in open-source AI projects, online coding competitions, and ML challenges
- Self-learning Deep Learning, NLP, and Reinforcement Learning through online courses and research papers

ADDITIONAL INFORMATION

Research Interests: Artificial Intelligence, Machine Learning, Data Science, Computer Vision, Natural Language Processing

Languages: English (Fluent), Hindi (Fluent), Marathi (Native)

Hobbies: Creative Drawing, Tech Blogging, Reading Research Papers, Contributing to Open Source
